

LEDs: The Green Light

Overwhelmingly preferred by shoppers, LED lighting provides exceptional illumination, energy efficiency and durability. The STYLELINE LED system offers brilliant performance and an environmentally-conscious alternative to fluorescent systems.

Features

- Provides **BOTH** reflective and refractive optics for superior light uniformity, merchandise visibility and glare reduction
- Meets or exceeds the "L70" standard (**70% Original light retention at 5 years**)
- Delivers in store levels up to 1,000 lux at the center of the shelf with a standard setback of 4 inches
- High-power technology that is **five times** brighter than a standard 5mm LED
- Up to **75% less wattage** than fluorescent lamps
- Exceptional performance in refrigerated conditions — LEDs love the cold!
- Stays cool to the touch, reducing heat load and compressor costs significantly
- Environmentally-friendly design contains no mercury or gas, and emits no infrared or ultraviolet radiation
- Low profile design makes light source invisible to shoppers
- Reduced unscheduled maintenance of lamps, ballasts, lens and sockets
- 1st LED to be granted UL listed certification for commercial refrigeration
- NSF compliant

LED Lighting Upgrade

- Available in 60" and 70" lengths
- 5-year warranty on workmanship & materials
- Includes power source

Optional LED Motion Sensors for additional energy savings

- Save up to **33%** on lighting costs with on/off cycling
- LEDs turn instantly on and off without experiencing any loss of life
- 360° coverage pattern
- Fresnel lens for accurate detection
- Upgrade includes two sensors per frame for complete coverage
