

Glide Sheets are made of durable, high-impact styrene with a concentrated silicone additive. They deliver an extremely low coefficient of friction that maximizes the efficiency of gravity-fed shelf systems. The perfect accessory for our SLIDE Trac & Super Slide Trac Shelving System.

STYLELINE Super Slide Trac Shelving System Shown

Glide Sheets comply with National Sanitation Foundation and Food and Drug Administration standards, and are USDA-approved for use in food stores.

Provide your customers easy access to your products, improve the cleanliness and appearance of your shelves, and increase the efficiency of your shelving systems.

Glide Sheets are available in black or white. On-site trimming may be required to meet your exact shelving system width.
